RECONNECT WITH NATURE

Bringing the great outdoors into your home or office is the best way to reconnect with nature.

The teams from DIGS and Heath Outdoor can provide gorgeous interior plantscapes to help you bring the outdoors inside with personalized interior plantscaping, including design, installation, and maintenance for both commercial and residential spaces in central Indiana.

BIOPHILIC DESIGN

What We Know

Biophilic Design

is an approach to architecture that seeks to connect people to nature.

Research shows that when green space is introduced in a work space, employers find:

- a 15% increase in employee well-being
- a 6% boost in productivity
- a 15% increase in creativity (with lowered stress and absenteeism.)

What's More...

Houseplants possess air cleaning properties which is directly linked to lowering blood pressure & heart rate levels.

Interior plants are also a great way to absorb background noise & provide privacy while creating a beautiful and inviting environment for your team and guests.

PLANTSCAPING SERVICES

heathoutdoor.net

CUSTOM DESIGN

With years of horticulture experience, our trained staff will consider your home or office's environment, including: room lighting, traffic patterns, temperature, available space, and other interior décor, to create your perfect design.

We have a large selection of acclimated plants and an assortment of beautiful containers in many shapes, sizes, and types of material to fit your space, budget, and vision.

heathoutdoor.net

INSTALLATION

After you've selected plants and containers for your space, our team gets to work preparing for installation. Once the plants and containers arrive at our warehouse, they undergo a full inspection, ensuring they're in top condition.

Plants are transported to your location, positioned, and staged per your approved design.

When we're done, we'll tidy everything up and leave you to enjoy your gorgeous new plant installation!

heathoutdoor.net

PLANT MAINTENANCE

On a weekly or biweekly schedule, our trained technicians provide watering, fertilization, dusting, cleaning, pruning, and disease and pest control as needed.

In the event that a plant needs to be replaced, we'll take care of that as well.

We'll provide worry-free service all you have to do is enjoy your plants!

GREEN WALLS

Living Walls

Limited on space but still want to make a big impression?

Our living wall installations take plants vertically, creating beautiful pieces of living art perfect for reception areas, meeting spaces, room dividers, and more.

Moss Art Walls

We use a mixture of real preserved moss, wood, and natural elements to create a one-of-a-kind piece that adds beauty to any space.

These installations can be placed just about anywhere and require no sunlight or pruning.

PLANT RENTALS, GIFTS & HOLIDAY DECOR
